### ANESTHESIA, SEDATION AND SURGERY

I hereby authorize the use of appropriate anesthetics medications and electronic monitoring systems as deemed necessary by the veterinarian. I have been advised as to the nature of the procedure(s) or operation(s) and the inherent risks involved with anesthesia and surgery. I realize that the outcome cannot be guaranteed. I understand that surgery and anesthesia may result in severe complications such as infection, bleeding, wound dehiscence and even death. I have read and understand this authorization and consent.

**As owner or representative of owner, I authorize the administration of anesthesia and surgery for my pet.**

### PRE ANAESTHETIC-BLOOD WORK

Pre anesthetic blood work is performed to detect any systemic abnormalities that might pose a risk to a patient while under general anesthesia. If major abnormalities are found, we may have to defer the procedure. If minor abnormalities are found, we will make appropriate adjustments to the anesthesia protocol to assure safe procedure.

**I approve pre anesthetic blood work \_\_\_\_\_**

### MICROCHIP IDENTIFICATION

A microchip is an identification system for your pet. It permanently identifies your pet and will help in getting them back if your pet is lost or stolen. The microchip is about the size of a grain of rice and is encoded with a unique ID number that will be assigned to your pet. Implantation is quick, easy and virtually painless (similar to a vaccine injection).

**I approve installation of Microchip in my pet \_\_\_\_\_**
